

Granulated sugars  
are the most  
versatile and  
widely used white  
crystalline sugars

## Granulated Sugar

Our 'standard' product is a high purity, free-flowing sugar. But we also offer a range of specially manufactured sugars designed to meet the needs of, and add unique benefits to, particular food manufacturing processes

# Granulated Sugar

## What makes granulated sugar special?

- A 'clean label' sweetness profile, unmatched by any other single ingredient
- A 'multi-purpose sugar', ideal for use in many different manufacturing processes.
- A universal bulking agent, providing texture and structure
- Adds taste and enjoyment to so many different types of food and drink
- Pure and natural.

## Applications:

- Standard granulated sugar is the ideal 'multi-purpose' sugar.
- Select granulated sugar is perfect for biscuit and pastry manufacture.
- BP/EP sugar is used in pharmaceutical Applications.

## Product development

If you have a specific requirement not covered by our standard range please talk to us about bespoke options and their lead times.

## Product development
